# CERAMIC SINK PRODUCT CARE AND CLEANING

Caple products are manufactured to the highest standard, by following these maintenance tips you can maintain the finish of your ceramic sink for longer:

## CARE AND CLEANING

- › Always wipe the sink down with warm soapy water and a cloth. This will remove general everyday stains from your sink. A ceramic sink rubber will clear most marks, we recommend these are used with washing up liquid.
- › In hard water areas limescale deposits can build up on the sink over time. The limescale can become strongly coloured by such foods as coffee and red wine etc., we recommend the use of lemon juice or vinegar to remove this. Simply apply, leave for a few minutes and rinse away with water.
- › If stains become ingrained in the bowl, an overnight soak using diluted biological washing powder should remove the marks easily. Ensure you thoroughly rinse the sink with water afterwards.
- › We recommend the use of baskets and chopping boards to reduce the risk of accidental damage.
- › You must not pour strong chemicals down the sink such as bleach, ammonia, caustic soda, white spirit and sterilising solutions. If this should accidentally happen, quickly wipe the spill away and rinse with plenty of water.
- › We do not recommend the use of a plastic washing up bowl, as particles of grit which may be impregnated in the base of the bowl could scratch surface of the sink.
- › Do not chop food directly on the sink surface, as this will cause damage. Wooden chopping boards are available for this purpose.
- › Avoid dropping sharp or heavy objects onto the sink as this may scratch, chip or crack the surface.
- › Leaving neat bleach in the sink can cause damage to all types of sinks. If neat bleach should come into contact with this product, please rinse thoroughly with warm soapy water.
