** Based on consumer testing in Germany comparing leading One Touch (Coffee + Milk) Full Automatic Espresso Machines (2023)

***When compared to previous Philips espresso machines

*****Based on 8 filter replacements as indicated by the machine. Actual number of cups depends on selected coffee varieties, rinsing and cleaning patterns

Highlights

12 hot & iced drinks

Our 12 recipes range from warming drinks like espresso, milky lattes and cappuccinos, right through to cooling iced coffees. We've calibrated our brewing system so even iced coffees have the same delicious flavour as hot drinks.

100% ceramic grinders

Bring out the full flavour of your beans with our hardwearing ceramic grinder. Fine-tune the grind size using one of 12 settings, from fine to coarse.

Eco Settings

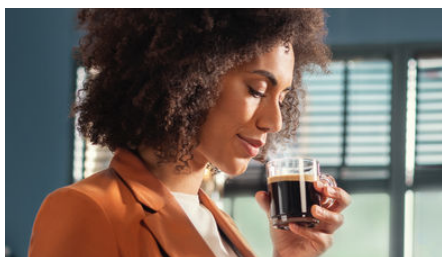

Use one of five Eco Settings to reduce water and energy consumption, without compromising on coffee quality. Our 4400 series allows you to dim the main and cup lights earlier than the default time, use less water while rinsing, switch to standby mode more quickly, or dim brightness.

LatteGo milk system

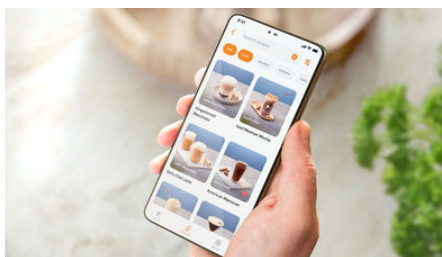

Our powerful cyclonic frothing technology lets you create silky smooth milk froth at the touch of a button, even with plant-based milk alternatives.

Perfect temperature and aroma

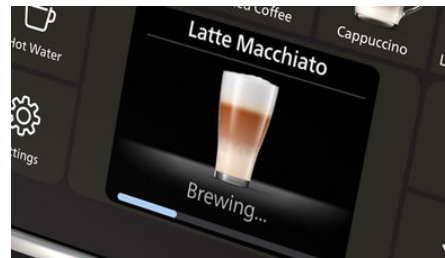

Our Aroma Extract system finds the ideal balance between temperature and aroma by keeping the water temperature between 90°C and 98°C, all while regulating the water flow rate.

Machine support on HomeID

Learn the ins and outs of your machine and discover new cafe-style coffee recipes on our HomeID app.

QuickStart

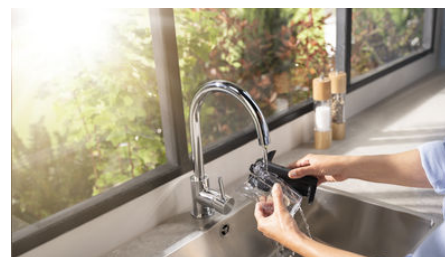

No more waiting for your machine to warm up. Our QuickStart function allows you to power on your machine and brew a coffee right away. Your machine will heat up based on the selected recipe.

AquaClean filter

Brew up to 5000 cups without having to descale using an AquaClean filter. It purifies water before brewing begins so your coffee tastes more flavoursome.

The fastest to clean milk system*

With just two parts and no tubes, our milk system can be cleaned in under 10 seconds, in the dishwasher or under a tap. Philips doesn't offer automatic cleaning as it requires complementary cleaning.

Specifications

Country of origin

Designed in: Italy
Made in: Romania

Customization

Aroma strength settings: 5
